

For a lethal cocktail
just add your car.

Drugs and driving don't mix.

- You've probably got the message about the dangers of drinking and getting behind the wheel. But drugs and driving can be just as dangerous.
- And being under the influence of more than one drug, including alcohol, makes you at an even more serious risk of having a car crash.
- If you're not worried about yourself, think of what

could happen to your friends and others on the road.

- The smart thing to do is to catch a cab or get a lift with someone who's straight.
- Confidential drug information and counselling is free and available any hour of the day or night on (02) 9361 2111 or toll-free for country callers on 1800 422 599.

WRECKED

Drugs and driving don't mix.

- There are many reasons not to do drugs, but driving is probably not one you automatically think of. However, drugs can affect your judgement and driving ability, putting you at serious risk of having a car crash.
- If you're not worried about yourself, think of what

could happen to your friends and others on the road.
